

Hanging LGM LED Grow Lights

The SolarOasis SunMount:

The SolarOasis SunMount growing system makes it easy to mount multiple grow bars when lighting larger growing areas. Made from strong, lightweight, Aluminum. The SunMount requires no assembly. Each grow bar attaches securely with provided hardware, and a single SunMount will hold from four to eight LGM3 LED grow lights.

For use with LGM3 model only.

The LED Grow Master bars on each SunMount are aligned in a staggered configuration, ensuring maximum light delivery to your plants. With LED plant lighting attached, a SunMount measures approximately two feet on each side. Special mounting tabs allow multiple SunMounts to be bolted together making hanging a breeze. (Grow bars not included)

LEDStik:

The LED Stick is available in 8' sections for greenhouse applications. Each LEDStik holds 4 LGM550 bars and is easily mounted with Griplock cable systems allowing for vertical adjustments. Both hardware and "LEDStik" come pre-assembled or to reduce shipping charges, materials are available from most local hardware stores. Each LEDstik will cover up to 48 square feet. Please call your representative for layout information.

Home Mounting:

Each LGM bar weighs less than a pound. They can be mounted with provided screws, chain, string, or even dental floss. Many applications can be simply mounted without the use of a frame. The Oak PlantPlace is available for wholesale clients. Minimum order of 25 pieces required. Retail clients interested in the PlantPlace please call for availability.
