

## The SolarOasis SunMount

The Solar Oasis SunMount growing system makes it easy to mount multiple Grow-Bars when lighting larger growing areas.

Made of two pieces of strong, lightweight aluminum sheets. The SunMount requires no assembly. Each grow bar attaches securely with provided hardware, and a single SunMount will hold from four to eight Gro-Bars.

**MSRP \$55.00 USD**

The LED Grow Master bars on each SunMount are aligned in a staggered configuration, ensuring maximum light delivery to your plants.

With Gro-Bars attached a SunMount measures approximately two feet on each side. Special mounting tabs allow multiple SunMounts to be bolted together and make hanging a breeze. (Grow bars not included)
